

Thank the Dutch parliament recognizes China's treatment of Uyghurs as genocide.

We are glad to hear that the Dutch parliament passed a nonbinding motion recognizing China's atrocities against Uyghur in occupied East Turkistan as Genocide. The Dutch parliament is the first legislature in Europe to determine that China's campaign of surveillance, mass detention, mass rapes, forced labor, and sterilization of Uyghurs amounts to genocide.

Unfortunately, we are very disappointed in Canada, and Netherlands ' government ministers have not honored their peace-loving people's voices yet. We strongly demand them to listen to their people and parliament members' voices to label China's atrocities against Uyghurs as genocide.

Please do not put money above humanity!

Please do not allow the dictator system to destroy our democratic system!

Please do not sacrifice your children's future and happiness for your own benefits!

We call all civilized and peace-loving worlds; follow the United States. Canadian and Dutch parliaments recognize China's atrocities against Uyghurs as genocide. And take decisive action such as deploying Peacekeeping troops, abolishing trade agreements, and cancel the 2022 Olympics to stop ongoing China's genocide.

Supporting China to hold the Olympics is a humiliation of the Olympics' spirit and encouraging the authoritarian regime to spread. We should never allow it to happen.

Again, thank the Dutch people and parliament!

Erkin Ablimit

President of East Turkistan Government in Exile
