

Our gratitude to Czech Senate for recognizing China's atrocities of Uyghur as genocide.

We praise the Czech Senate has recognized the Chinese government's treatment of Uyghurs and other ethnic and religious minorities in occupied East Turkistan, an open-air prison, as Genocide and Crimes Against Humanity. Joining the U.S. government and the parliaments of the UK, Canada, Netherlands, and Lithuania hope the other countries to do the same soon. No time to wait!

We are eagerly awaiting the results of the key vote in the Belgian Parliament on a motion led by Samuel Cogolati MP tomorrow, and we believe the peace-loving Belgian people and their Parliament will declare China's atrocities as genocide.

We also call all civilized world and leaders, enough is enough, will not allow the Chinese government repeatedly broke promises, steal properties, cover up the truths, spread disinformation and develop bioweapons. Please reject the evil government for the sake of our children and grandchildren's happiness.

We also strongly demand all political leaders don't stay silent while the Chinese Government carries out the silent, hidden genocide; NEVER AGAIN, take decisive actions such as deploying peacekeeping troops, abolishing trade agreements, and canceling the 2022 Olympics to stop the genocide and authoritarian viruses from spreading across the globe.

Millions of lives desperately depend on your help to survive.

Sincerely,

President: Erkin Ablimit
